

# Artificial Sunlight

## Wide irradiation - High intensities Illumination

**Further length**

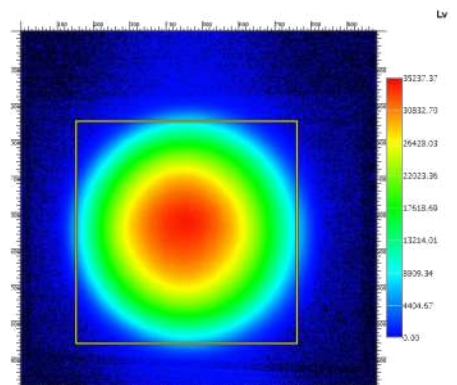

**Wider range**

**Higher intensities**

**Than SOL series**

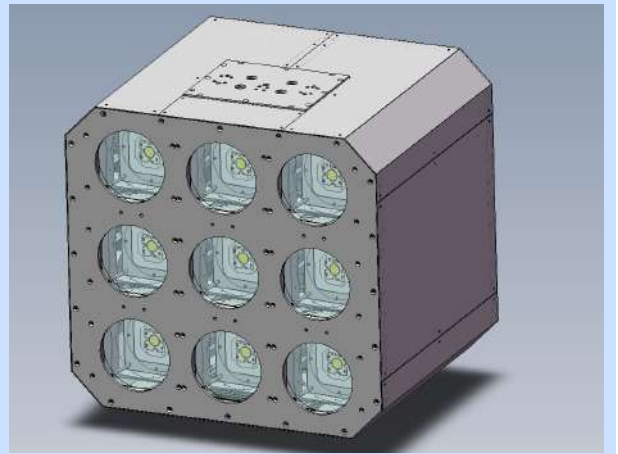

**Customize and Manufacture an illumination system as a required irradiation length/ irradiation range/ illuminance.**  
**We achieved to manufacture visible+ NIR illumination system.**  
**Please consult us.**

**【Example①】**

**Irradiation length : 3 [m]**  
**Irradiation range : 0.5×0.5 [m]**  
**Illuminance : 120,000 [lux]**  
**Color temperature : 6000K**

**【Example②】**

**Irradiation length : 1.5 [m]**  
**Irradiation range :  $\phi$ 0.8 [m]**  
**Illuminance : 50,000 [lux] + Near Infrared**  
**Color temperature : 5500K + NIR wavelength**  
**Others : Elevator function of an irradiation part**

**【Example③】**

**Irradiation length : 2 [m]**  
**Irradiation range : 2×2 [m]**  
**Illuminance : 2~20,000 [lux]**  
**Color temperature : 6000K**  
**Others : Illuminance changeable range of 2 to the 16th power (65000+times)**
